Abstract (en)

[origin: EP1016392A1] A tridimensional disposable absorbent article having a tridimensional shape prior to use with a generally upwardly convex rear region, having a body facing surface and a garment facing surface, a longitudinal symmetry plane, a front end edge and a rear end edge, and comprising a liquid pervious topsheet, a backsheet joined to said topsheet and an absorbent core intermediate the backsheet and the topsheet. The absorbent article is intended for direct application to the user's body before an undergarment is worn, and comprises a system for attachment of the article to the undergarment with an adhesive means that can be activated after the undergarment has been worn. <IMAGE>
