Abstract (en)  
[origin: WO0058351A2] Disclosed herein is an isolated DNA construct encoding enzymes necessary for the biological synthesis of zwittermicin A, a unique aminopolyol antibiotic produced by *Bacillus cereus* that is active against diverse bacteria and lower eucaryotes. Also disclosed herein are hosts transformed to contain and express the DNA construct, and a method to produce zwittermicin A using the construct and transformed hosts.
