Abstract (en)
[origin: WO0055400A1] The invention relates to a spinneret for producing fibre filaments. The spinneret is provided with at least one nozzle opening for the delivery of the spin dope. At least one nozzle opening is provided with a finite length (S). A tubular inset is inserted into each nozzle opening in such a way that said inset can be removed therefrom. The spin dope is guided through the inset to the exterior. The tubular inset can be designed as a crown tube.
