Abstract (en)
[origin: WO0056988A1] The invention relates to a tub support (19) connected to a front wall element (1), wherein the tub support (19) is embodied in the form of a rack (18) having special feet (21) at least in its base area. In order to advantageously stabilize and simplify construction while preserving the advantages of a multiple unit tub support structure, the rack (18) is fixedly attached to the front wall element (1).
