Abstract (en)
[origin: WO0056998A1] A screeding machine suitable for the construction of floor foundations (100), which consists of a frame comprising two lateral guides (10, 11) on which two carriages (12, 13) fitted with wheels (18, 19, 191) advance; the said carriages traverse connected to two bodies or beams (14, 15), which slide against one another. At least one (15) of the two beams (14, 15) contains two linear guides (24, 25) with two sliding carriages (26, 27) associated with an L-shaped support structure (17) that holds a cutter (16), which rotates in a direction (H, M) that depends on the direction of traverse (G, L) of the sliding carriages (26, 27).
