Abstract (en)  
[origin: WO0151803A1] The invention relates to a fuel injection pump comprising a housing (10), a dosing pump (18, 20) and an injection control device (26) for the dosing pump. Said injection control device is provided with a piston (28) which is impinged upon by a return spring (48). The aim of the invention is to improve starting behaviour of the internal combustion engine that is supplied by the injection pump. A starting spring (50) is additionally provided which impinges upon the piston (28) and acts against the return spring.
