Abstract (en)

[origin: DE19914742A1] The invention relates to a method of transmitting data, according to which the data to be transmitted and/or data corresponding to same are transmitted via a first transmission channel and in addition via a second transmission channel. The method described in the invention is characterized in that the data transmitted via the first transmission channel and the data transmitted via the second transmission channel can be transmitted with a time lag in relation to each other.
