Abstract (en)
[origin: WO0059198A1] Disclosed is a computer implemented billing system arranged to assign a charge type identifier (CTI) to each of a number of usage records; and to process each usage record in dependence on its assigned CTI to produce a bill image, the format of the bill image being dependent on the CTIs of the usage records. Also disclosed is a method of generating a bill image in a computer-implemented billing system, the method comprising the steps of assigning a charge type identifier (CTI) to each of a number of usage records and processing each usage record in dependence on its assigned CTI to produce a bill image, the format of the bill image being dependent on the CTIs of the usage records.
