Abstract (en)
[origin: EP1164010A1] The appliance incorporates a continuously circulating conveyor (14) conveying the objects (18) each carried by a holder (16) along a conveyor track. The track has at least one handling unit and at least two transfer units, one of which is a supply unit, and the other a discharge unit. The object during printing is rotated on its lengthwise axis in a first direction , and, after printing, is rotated back to its original position in the opposite direction on its lengthwise axis.
