Abstract (en)

[origin: EP1164334A2] In the manifold housing (10), pipe pieces (4) are integrated at a distance (2A) from each other which is twice the grating distance (A). The pipe pieces run from the upper wall (11') of the manifold housing, through the upper chamber (2), downwardly through the dividing wall, into the lower chamber (3). The pipe pieces are sealingly closed at their upper ends until being connected to the pipework (5).
