Abstract (en)
  [origin: US2002026317A1] The invention relates to a process for outputting a spoken announcement, the content of which is a function of the data content of at least one data record, wherein an announcement type is selected by means of a first program segment on the basis of the data content, a second program segment for the program-controlled output is made available, which second program segment is suitable for the selected announcement type, the parameters required for the second program segment which has been made available are determined, and the spoken announcement corresponding to the selected announcement type taking into account the determined parameters is output. The invention further relates to a spoken announcement module and a program module therefor.
