Abstract (en)

[origin: FR2791259A1] The invention concerns a method for increasing the differentiation and/or proliferation rate of skin fibroblasts and/or increasing the differentiation rate of skin keratinocytes by applying on the skin a composition comprising an efficient amount of ascorbic acid or of at least one of its analogues. The invention also concerns a method for stimulating cutaneous vimentin by applying on the skin a composition comprising an efficient amount of ascorbic acid or of at least one of its analogues. The invention further concerns a method for stimulating cutaneous keratin 10 synthesis by applying on the skin a composition comprising an efficient amount of ascorbic acid or of at least one of its analogues.
