Abstract (en)
[origin: WO0051735A1] The invention provides systems and methods for dispensing liquids. One liquid dispenser comprises a base member (12) and at least 864 syringes that are operably coupled to the base member (12). Each syringe has a distal tip, and the syringes are each configured to aspirate and dispense a substantially equal volume of liquid. Further, the syringe tips are disposed within an area that is less than about 80 cm².
