Abstract (en)
[origin: WO0053342A1] The invention aims to improve the sorting quality of a sorting device capable of high through-put and having a simple structure, notably of a device for sorting paper and cardboard waste. The products to be recycled are delivered to the sorting device and residual products are evacuated through an outlet (A). The invention provides for the sorting device (1) to consist of several conveyor strips (4) which are positioned next to each other, are mounted on two crankshafts (2) and have carriers (5) on their upper sides.
