Abstract (en)
[origin: US6302172B1] A support device for supporting, in a cantilevered-out position, a receptacle having a neck that includes a collar, the device comprising a resiliently-closable clamp having first and second hinged-together jaws, and a rigid support element presenting a lateral opening forming a housing for a portion of the neck and a support for the collar of the receptacle, the support element extending beneath the clamp and being spaced apart therefrom.
