Abstract (en)  
[origin: WO0058670A1] A method for ventilating a room, wherein air is led into the room through an outflow opening (17) in the ceiling (1) of the room. The outflow opening (17) causes the air to flow out substantially at an angle of less than 45 degrees with the ceiling surface. Preferably said angle is substantially parallel to the ceiling surface (1). The outflow opening (17) has an elongated shape which extends substantially parallel to the ceiling surface (1).
