Abstract (en)
[origin: WO0060563A1] The invention relates to a presentation system (1), in particular, for displaying images at trade fairs, theatrical productions, or similar. The presentation system has a flat medium (2), at least one retaining element (3) for holding the flat medium and at least one fixing element connected to the retaining element for spatially fixing the flat medium. The retaining element consists of at least one elastic element (5). Said elastic element is substantially inflexible in a first transverse direction (6) in relation to the longitudinal fibre (7) of the elastic element and is flexible in an additional transverse direction (8) in relation to said longitudinal fibre, in such a way that the elastic element can be rolled up and/or folded.
