Abstract (en)
[origin: WO0059192A1] A system and method for providing regiospecific information to a user. The system includes a cellular communication network (12) having a plurality of regiospecific cells (13), a plurality of mobile cellular communication devices (14) communicating with the cellular communication network, each of the cellular communication devices being operable by a user, and a database system (52) communicating with each of the plurality of mobile cellular communication devices through the cellular communication network, the database system storing regiospecific information which is providable through the cellular communication network to a user using a mobile cellular communication device of the plurality of mobile cellular communication devices.
