Abstract (en)  
It comprises a back (1) and a seat (2), which hinged to the back about an hinge axis (6), said seat (2) being moveable between a substantially vertical position and a substantially horizontal position, and also comprising automatic returning means (8) of the seat (2) from its substantially horizontal position to its substantially vertical position when the user stands up from the seat. It is characterized in that these automatic returning means (8) of the seat (2) to its substantially vertical position are arranged on the hinge axis (6), this hinge axis (6) being located in the contact area between the back (1) and the seat (2). There is not any separation practically between the back and the seat when the seat is in its substantially vertical position, being this area preserved from dust and dirt. <IMAGE>
