Abstract (en)

[origin: EP1166821A2] The invention relates to a compressed air registration board for registering the deployment time of compressed air carriers, wherein the registration hereof is started electronically. For this purpose a name tag with the data of the compressed air carrier and/or the compressed air apparatus in use is provided with a plug which fits into a socket mounted on the compressed air registration board, wherein the time registration begins when contact is made. Because the registration of the deployment time can be started with one operation, the safety of the compressed air carrier is hereby increased considerably. <IMAGE>
