Abstract (en)

[origin: EP1166966A2] A recording liquid comprises a pigment(s), and a polymer having an amide bond, urethane bond, and/or urea bond in the molecule and having an acid value of free acid of 55-350 mg potassium hydroxide/g. The surface tension of the recording liquid is 25-54 dyne/cm. An Independent claim is also included for an ink jet method comprising using the recording liquid on a recording sheet having an ink receiving layer on the side(s) of the support.
