Abstract (en)  
[origin: EP1167109A2] The selection switch device has a base body (8) which is partially enclosed by a housing body (2), provided with a sliding or pivoted body (3), held in an initial position relative to the base body by a magnet device (6) and displaced relative to the base body via a movement element (5), with a positioning device (7) determining the relative position between the base body and the housing body.
