Abstract (en)

[origin: EP1167652A1] Temporary paving comprising panels and supports for said panels, which is easily put into service, can be dismantled in a short time and occupies a reduced space once dismantled, characterised by each support comprising four equal sectors, each sector having a pivot located on the bisector of the sector, each sector being separated from the adjacent sectors by two or more means of separation and by the supports supporting rectangular or square panels that constitute the pavement which panels have, in proximity to the corners and preferably on the bisectors of the same angles, four holes that fit over the pivots of as many supports. <IMAGE>
