Abstract (en)

[origin: EP1167678A2] The draught seal for the lower edge of a building door has a seal strip (12) mounted on an inner rail (15) to be selectively raised by a linkage (14). The linkage has a stop on its inner end to produce a stop connection with a releasably mounted rod (13) or the strip. The linkage can be alternatively connected with the receiving socket (20).
