Abstract (en)

[origin: WO0059522A1] Extracted products from Brickellia californica and isolated flavonoids, including apigenin, luteolin, quercetin and dihydroxykaemferol, purified from Brickellia californica are useful for the treatment of diabetes. The extracted products and purified flavonoids may be used alternatively in the treatment of both insulin dependent and non-insulin dependent diabetes because these materials result in significant lowering of blood sugar.
