Abstract (en)
[origin: US6707395B1] A circuit configuration for switching navigation lights of a watercraft, especially a sailing vessel, includes elements that prevent a position light configuration from not being in compliance with regulations as well as elements that prevent navigation lights that have mutually exclusive meanings from being switched on at the same time, and a single multiway switch (1) with which the navigation lights and additional lights, that are independent therefrom can be switched.
