Abstract (en)

[origin: WO0048909A1] The present invention relates to methods and apparatus for grading, orientating and packaging items of elongated non-symmetrical shape. In particular the method and apparatus relate to arranging elongated items such as fish into boxes/portions according to their weight and/or size, and their orientation or after reorientation of the items. Further the invention relates to the problem of arranging items into portions according to one or more predetermined characteristics as well as arranging and directing item filled portions fulfilling the same specific criteria to a specific location and marking the portions (boxes) accordingly.
