Abstract (en)
[origin: WO0027719A1] The invention relates to an arrangement (1) for a portable bucket (2) or a similar container which includes a carrying handle (6). The bucket (2) exhibits triangular cross-sectional form. The angle (X) between the two shortest sides (7, 8) of the bucket is essentially a right angle, and the handle (6) is arranged in such a way that the effective carrying point (9) for the bucket (2) is situated in a vertical plane (10) located at a point ca. 1/3 across the width of the bucket between the longest side (11) of the bucket and the right angle (X) closest to the aforementioned longest side (11) of the bucket (2).
