Abstract (en)

[origin: FR2791955A1] The invention concerns a device for closing the dispensing orifice (5) of a fluid product dispenser, comprising a removable cap (10) provided with a closure element (20) which, in closed position, closes said orifice (5). The invention is characterised in that said closure element (20) comprises a bactericidal and/or bacteriostatic substance acting on the small amount of product remaining at said orifice (5) after the dispenser has been actuated.
