Abstract (en)

[origin: WO0062226A2] A method for generating an event calendar. The method includes receiving an event definition on a first computer. The event definition is transmitted from the first computer to a second computer using an extensible markup language (XML) document and a hypertext transfer protocol (HTTP). The event definition is held on the second computer for approval. The event definition is published on the event calendar on the second computer using a template to control formatting after receiving approval.
