Abstract (en)
[origin: EP1169905A1] An elevator (12) for bulk material includes an elevator head (12a) that mounts a mass flow measuring device (21). The elevator head (12a) also supports the upper sprocket (23) of the elevator (12). The elevator head (12a) is pivotable thereby permitting adjustment of the elevator chain tension without altering the spatial relationship between the elevator paddles (32), the top (50) of the elevator head (12a) and the sensor surface (54) of the mass flow measuring device (21). <IMAGE>
