Abstract (en)

[origin: EP1169940A1] Applicator has a head with a series of transverse elements (80) on a support (2). The elements have gaps between them and are positioned so that a portion of the edge of one element (81) converges with a similar portion on an adjacent element (86) to create a constriction for a fibre passing through it. The transverse elements can be triangular, circular, square or hexagonal and are shaped to form two or more constricting zones round their edges.
