Abstract (en)
[origin: US2002053530A1] The invention concerns a case for containing cards (1), in particular visiting cards, credit cards, playing or postal cards, generally parallelepiped in shape, comprising two opposite surfaces (2) and (3) and four side elements, in opposite pairs, two lateral (4) and (5) and two transverse (6) and (7), and a device for inserting the cards in the case and dispensing them as requested. The card inserting and dispensing device (1) is characterised in that it is provided by one of the two surfaces (2, 3) which comprises lateral slots (8) and (9) located on the side edges opposite the lateral elements (4) and (5) and a transverse slot (10) located on one of its opposite transverse edges (6, 7) such that said surface (2) is spaced apart from the case, by bending, each time the cards (1) pass through.
