Abstract (en)
[origin: WO0057837A2] Compositions and methods for raising the level of HDL cholesterol and apolipoprotein AI in a patient and for lowering the
levels of VLDL cholesterol and LDL cholesterol in a patient, including compositions and methods which effect the expression of a gene, LIPG, which
encodes a lipase enzyme that is a member of the tryacylglycerol lipase family or which effect the enzymatic activity of the enzyme.
