Abstract (en)

[origin: US7343949B1] The invention concerns an installation comprising a feeding device ( 100, 101, 103, 104, 1, 11, 12 ) unwinding the support (G) and a treating device ( 105, 4 ) for operating on the parts (P). A reading unit ( 102 ) positioned on the passage (Z) of the bar codes (CB) of the parts (P), supplies signals (SL). A data source ( 107 ) contains data concerning the bar codes (CB). A control circuit ( 106, 5 ) receives the sense signals (SL) and the data signals (SD) so as to compare them and transmit control signals (SC) for the treating device ( 105, 4 ).
