Abstract (en)

[origin: WO0065020A1] The invention aims at providing a pourable hand dish washing detergent that can be precisely dosed, provides excellent cleaning properties, is skin tolerable and stable to temperature and storage, wherein, optionally, the physically or chemically incompatible or sensitive ingredients are incorporated in a temperature, storage, transport stable and easy-to-use manner and presented in a corresponding optical form and wherein said ingredients are released before being directly used or during utilization. This is achieved by a thick, aqueous surfactant-containing agent with anion surfactant, amphoteric surfactant, polymer and microcapsules, in which one or more ingredients of the hand dish washing detergent are totally or partially included.
