Abstract (en)
[origin: WO0060147A1] The present invention relates to a method for manufacturing synthetic fibres, comprising of forming a main stem from at least one polymer or polymer mixture and arranging on the main stem fibrils of at least one polymer or polymer mixture. The invention further relates to a nozzle for manufacturing a synthetic fibre with one or more fibrils, comprising a passage for forming a main stem of the synthetic fibre which extends from an inlet of the nozzle to an outlet, and at least one filling space which is connected to at least one moulding chamber for forming the fibrils, wherein the moulding chamber debouches in the passage for forming the main stem.
