Abstract (en)  
[origin: EP1172490A2] Wall-integrated cistern comprises a box body (1) having a connection (2) for the rinsing water and a connection (3) for the toilet outlet. A valve is arranged in the box body and an opening (110) for inspecting and for connecting an operating device is also included. The box body is divided into a lower part (10) for receiving the rinsing water and the valves and a covering part (11) for covering the opening. The covering part is fixed to the lower part in the insertion site. Preferred Features: The covering part is held on the lower part with fixing devices in the insertion site. A wall molding (101) with axial grooves (102) is formed on the lower part.
