Abstract (en)

[origin: EP1172498A2] The device (10) for fixture of a flat roof covering on insulation has a disk (12) for location on the covering and a hollow shaft (14). The disk is a separate plate part from the hollow shaft and is provided with claw components (32), which press into the roof covering. The hollow shaft has a head (16), beneath which the disk is positioned. The disk is provided with a stiffening formation (26).
