Abstract (en)
[origin: EP1172500A1] A stone cladding system (1) for building has a support frame formed by a plurality of spaced-apart upright mullions (2) fixed to an exterior (4) of a building by anchor brackets (3), with a number of horizontal cladding panel support rails (6) mounted in vertically spaced-apart rows on the mullions (2). Each stone cladding panel (8) is mounted between an adjacent pair of vertically spaced-apart rails (6) with a bottom of the cladding panel (8) seated on the lowermost rail (6) and a top of the cladding panel (8) secured to the uppermost rail (6) by a pair of retaining dips (9). A bottom of each stone cladding panel (8) is fully supported along its length by the lowermost rail (6). <IMAGE>
