Abstract (en)  
[origin: EP1172516A1] Control circuit for a motorized roller shutter (2) has a housing (6) with an inverter switch (7) to control raising and lowering of the blind panel (5). Inverter switch is connected to a power source (8) and wired to the drive motor (3) mounted in a housing (10). A motor shut off control circuit (11) is positioned in a control box (6), which uses motor load to control the end of shutter movement.
