Abstract (en)

[origin: EP1172548A2] Muffler (1) for muffling the intake noise of compressors and/or for muffling discharge noise from compressed air systems comprises baffle plates (6) arranged inside the muffler which run at an angle (α) of between 45 and 70 degrees to the basic flow direction and force air flowing through to follow a meandering course. Preferred Features: The baffle plates are parallel. Air-permeable, open-pored foamed material (3) is positioned near the low-pressure opening (5).
