Abstract (en)

[origin: EP1172616A2] Process for operating a storage device comprises only partially charging the device at determined times so that after achieving a determined temperature in a determined distance from the base charging is stopped after the predetermined time. An Independent claim is also included for a device for carrying out the operating device comprising a cold water feed (2), a cold water outlet (4) and a hot water feed (7). A temperature sensor (13) is arranged between the base and the upper connection of the storage device and is connected to a control device (10). A further temperature sensor (12) is likewise connected to the control device.
