Abstract (en)

[origin: FR2792620A1] The support (1) for a flexible pouch consists of a thick circular disc (11) with a large diameter through-bore (13) and a bushing (12) on which a liquid delivery pump may be mounted. There is a flange (10) on the side of the disc adjacent to the bushing for the pump. There are two nipples (14) on either side of the large diameter through-bore, which may be connected (15a) to this through-bore. A tube (2), open at both ends, may be attached to one of the nipples.
