Abstract (en)

[origin: US6533001B1] A filling machine including at least one filling tube (22), whereby a product flows through said filling tube and said filling tube is placed opposite the opening of a receptacle that is to be filled. The feed for the filling tube is controlled by a valve (30) which is arranged in a downward skewed position in relation to the tube and the valve is joined to the tube by a feed pipe (28).
