Abstract (en)

[origin: WO0063377A1] The present invention relates to polynucleotide and polypeptide molecules for zacrp3, a novel member of the family of proteins bearing a collagen-like domain and a C1q domain. The polypeptides and polynucleotides encoding them, are involved in dimerization or oligomerization and may be used in the study thereof. The present invention also includes antibodies to the zacrp3 polypeptides.
