Abstract (en)
[origin: WO0163718A1] The invention relates to a method for a holding device used to secure conductor foils, comprising a base plate which is mounted on a fixing surface and a fixing button which is placed thereon and which can be inserted into a through hole provided in the conductor foil. The fixing button comprises at least one moveable part which enables a conductor foil to be placed in a first position and be fixed in a second clamping position.
