Abstract (en)

An edging unit (1) applicable to machines for working the edges of plates, particularly of glass plates (L), comprising, at at least one edge of a plate (L) being worked, a first movable element (2) and a second movable element (3) which respectively support a first grinding wheel (5) and a second grinding wheel (6). The movable elements (2,3) are connected to actuators (20,21) in order to respectively move the first grinding wheel (5) so that it acts on the front edge of the plate (L) being worked and the second grinding wheel (6) so that it acts on the rear edge. <IMAGE>
