Abstract (en)
[origin: EP1174562A2] The awning assembly has a rod (2) to wind the awning fabric, with a torsion spring (4) which acts on the rod in the winding direction. The awning winding rod is in a housing (1), with one end mounted at an end cover (11). The spring is within one end of the winding rod. The other end of the winding rod is supported by a bearing journal (23), extending from the other end cover (17) of the housing. The bearing journal is a drive shaft or extension of an electromotor (19), and is fitted with a cable disk (21).
