Abstract (en)

[origin: EP1174578A2] The connection, to link together the profiled bars of window/door frames, uses an opening (56) in a wall (36) of one metal profiled bar (30). The second metal profiled bar (32) has an end side (58) at the first bar, with a plastics holder which is clamped by a tightened bolt (62) through the wall opening and pulls the second bar against the first.
